RE: NG-00300/PI-98
Type 2 Status

This is an official request to the NPSC to make permanent the “grandfathered waiver” as a type 2 customer with respect to the Cabela’s Sidney, NE Distribution Center.

We currently have increased controls to be able to fix our natural gas prices at times we believe are more attractive than what is offered by the standard Kinder Morgan program. This increased ability results in substantial savings to our company. These savings are generally driven towards continued growth and an increased ability to hire an expanding employee base in Nebraska.

All metering equipment in our facility is the same that is installed in qualified Type 2 accounts. Our current supplier holds firm the transport on the KMI mainline and such offers by KMI duplicate the ability of our current supplier. This duplication is not needed. Our preference is for our supplier to manage transport on our behalf, similar to what KMI has offered in their original settlement.

We believe that our company has demonstrated strong commitment to Nebraska. We hope that the NPSC makes an effort to understand the effects of it’s actions on business owners throughout our state. Thank you for consideration in this matter.

Sincerely,

Alan Beyke
Asset Development Manager
Cabela’s Ventures Inc.
